

Tyler Moberg

A learning scientist who specializes in AI.

Keynotes that get people using AI before they're back at their desks.

Nobody sits through a lecture. Your people won't just hear what's possible, they'll try it before they leave the room.

Signature keynotes

Flagship keynote: corporate and leadership

The AI-Leveraged Leader: Practical Tools and Techniques for Exceptional Results

This is the talk I'm asked for most, delivered to corporate teams, government agencies, YPO forums, and associations. It's hands-on within the first few minutes, so nobody just watches me demo.

Co-keynote with Dan Oblinger

EQ + AI: Leading with Clarity

I share the stage with Dan Oblinger, a hostage negotiator who teaches emotional intelligence. We take one leadership scenario every room recognizes and work it with five strategies that combine EQ and AI, so you watch both sides solving a problem together.

Keynote: educators and higher ed

Teaching with AI: 7 Habits to Amplify Learning

Seven habits that keep students doing the thinking while AI amplifies the learning, grounded in the Intentional Intelligence Scale and two decades in classrooms. Educators leave with design moves they can use in Monday's lesson, not a philosophy debate.

"I learned about Amplified Impact by attending a Young Presidents Organization (YPO) event on artificial intelligence. I was so impressed, I reached out to Tyler immediately after because I wanted my company to have access to the same wisdom shared with dozens of executives."

Huck Finn

President, API, Inc.

"I have literally dove headfirst into AI, and I'm still in disbelief about what's possible."

Brittany Rowe

Payroll/HR, Parkers Prairie ISD #547

Reported AI confidence

2.3 3.7

On a five-point scale, across 547 post-training survey responses.

10,000+ professionals trained since 2024

NPS 79, zero detractors (ACEC Utah, full-day event)

Audiences include

ACEC Minnesota	California Hospital Association
ACEC Arizona	Twin Cities NECA
ACEC Utah	Normandale Community College
YPO	Altana FCU
Wyoming Hospital Association	MSBA

About Tyler

Tyler Moberg is a learning scientist who specializes in AI and the founder of Amplified Impact. A former National Trainer for The Bob Pike Group, he's trained 10,000+ professionals since 2024. His keynotes and workshops are hands-on, so people use AI on their real work before they leave the room.
